April 29, 2010 – Walter Murray Collegiate finishes in top five at prestigious Canadian Math competition

What do they put in the water at Walter Murray Collegiate that makes the students so clever? Inquiring minds want to know!

Walter Murray students recently won a number of awards at the Canadian National Mathematics League sponsored by the University of Windsor.

Murray students competed against thousands of students from hundreds of Canadian high schools (including both public and private) and came out on top.

“Walter Murray finished ahead of some prominent Canadian private schools, including Upper Canada College and the Academy for Gifted Children,” says Bruce Bradshaw, principal of Walter Murray Collegiate. “We have a very strong math program at our school and these wins are not only due to our incredibly smart students, but the passion for mathematics inspired in our students by teachers Janet Christ and Vic Pankratz.”

Math isn't the only academic area where Murray students lead the pack. In April, Marauders are participating in a nation debating championship and a national bio-tech challenge after winning at the provincial level.

It's obvious the teachers and students at Walter Murray Collegiate contribute every day to Saskatoon Public Schools as a division that inspires academic excellence.
